

GIVE YOUR SKIN  
A NEW CHANCE

## Eryfotona Actinica<sup>®</sup> Ultralight Emulsion

With DNA Repairsomes<sup>®</sup> and antioxidants

**Eryfotona Actinica<sup>®</sup>** is designed to enhance skin health:

- Helps to address existing actinic damage with DNA Repairsomes<sup>®</sup> that deliver encapsulated photolyase enzymes.
- Helps to prevent additional actinic damage with 11% zinc oxide (50+ SPF, broad spectrum UVA/UVB)

**Eryfotona Actinica<sup>®</sup>** is an ideal adjuvant product for a range of patients:

- Patients receiving treatment (cryo, PDT, topicals) or have a history of Actinic Keratoses.
- Patients at risk for sun damage (all Fitzpatrick types)
- Patients that are undergoing lasers, peels or other cosmetic procedures where sun avoidance is important.
